

Announcing the
**South Carolina Learning Collaborative on
Trauma-Focused Cognitive-Behavioral Therapy - 2019**

Project BEST (www.musc.edu/projectbest) will conduct the **SCLC-2019**, a 10-month clinical learning collaborative on TF-CBT for mental health treatment providers serving abused and traumatized children and youth in South Carolina.

Who:

The learning collaborative is intended for **therapists** and **clinical supervisors** possessing a clinical masters or doctoral degree in a mental health profession who do psychotherapy with abused and traumatized children and youth in South Carolina. Participants may include clinical social workers, professional counselors, psychiatrists, clinical psychologists, marriage and family therapists, clinical nurse specialists, and other mental health professionals. The **SCLC-2019** is limited to **60 participants**. Preference will be given to participants from organizations that previously participated in a Project BEST community-based or clinical learning collaborative.

What:

Trauma-Focused Cognitive-Behavioral Therapy (TF-CBT) is the most well-supported, evidence-based treatment for children/youth and their caregivers who have experienced or been exposed to abuse, violence, or other potentially traumatic events, and who have clinically significant problems as a result. Participating clinicians will learn to deliver TF-CBT with high clinical competence and adherence to the treatment model from **nationally approved TF-CBT trainers**. The **SCLC-2019** will consist of multiple training activities, components, and modalities, including:

- 1) Self-directed readings and online training. (Registration to TF-CBTWeb 2.0 is included, a \$35 value.)
- 2) **2** two-day in-person learning sessions (4 days total of in-person training)
- 3) **14** one-hour clinical case consultation calls over 7 months on TF-CBT training cases
- 4) Collection and use of clinical assessment, fidelity, service delivery, and implementation tools and metrics

All clinical training is conducted by nationally approved TF-CBT trainers.

Participants completing all SCLC-2019 training requirements will:

- 1) Receive a **Certificate of Completion** from Project BEST
- 2) Receive up to **35** continuing education contact hours
- 3) Be listed on the Project BEST **Roster of Trained Professionals** (www.musc.edu/projectbest)
- 4) Will have met the online and in-person training, and the clinical consultation call requirements for **National Certification in TF-CBT** (see www.tfcbt.org for more information about other requirements).

When:

August 6, 2018 – Registration Opens; September 6, 2018 – Registration Closes
